

Pavement Condition Index

After the 2017 pavement management update and recent pavement projects (slurry and resurfacing), the Town’s overall network PCI is a 81 PCI. The overall network condition is a weighted average PCI which is equal to each management section PCI multiplied by its area and divided by the total area of the network. **Figure 4** is a street-by-street map of the pavement condition index.

Figure 4. Street-by-Street Map of Pavement Condition (December 2017)

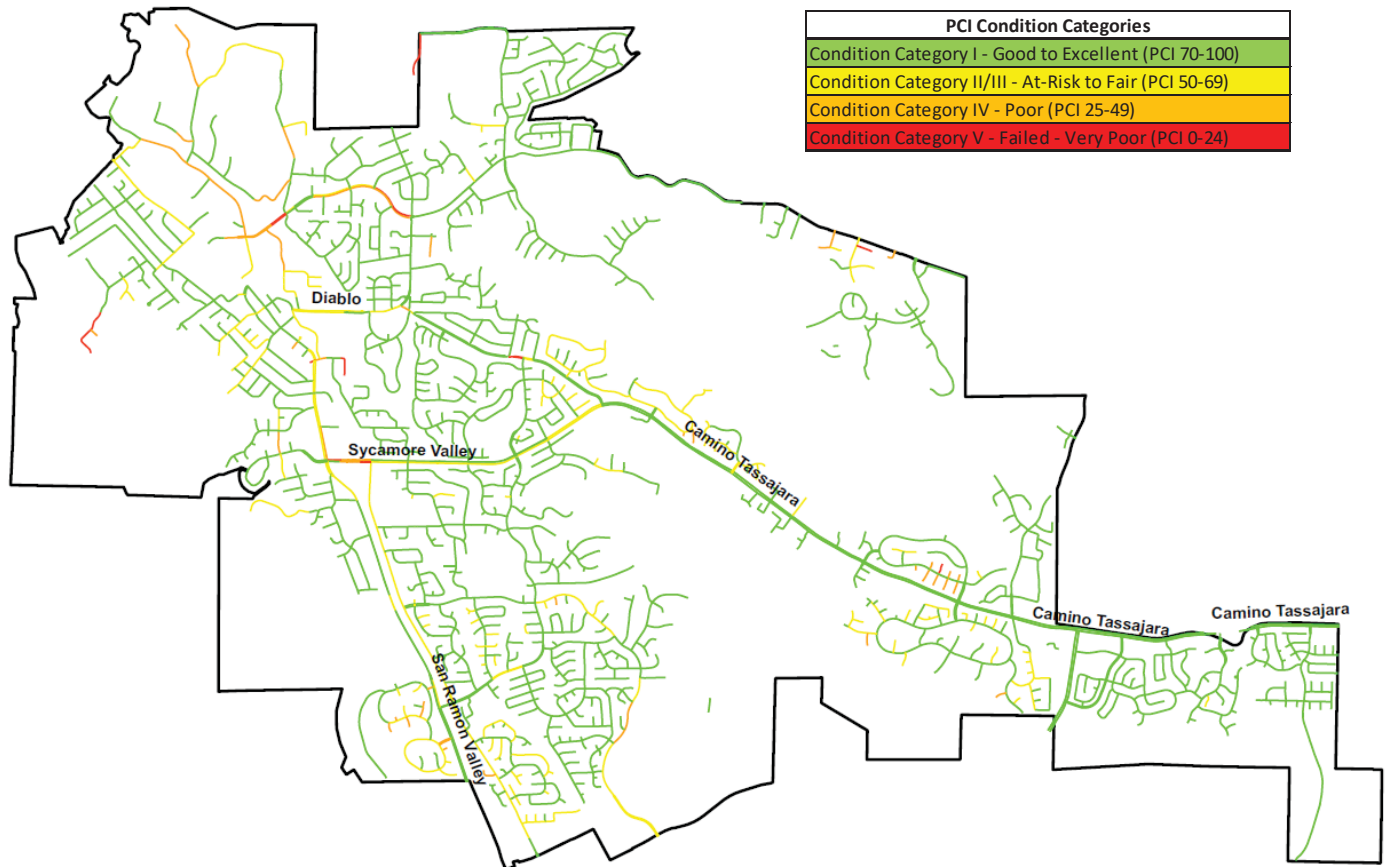

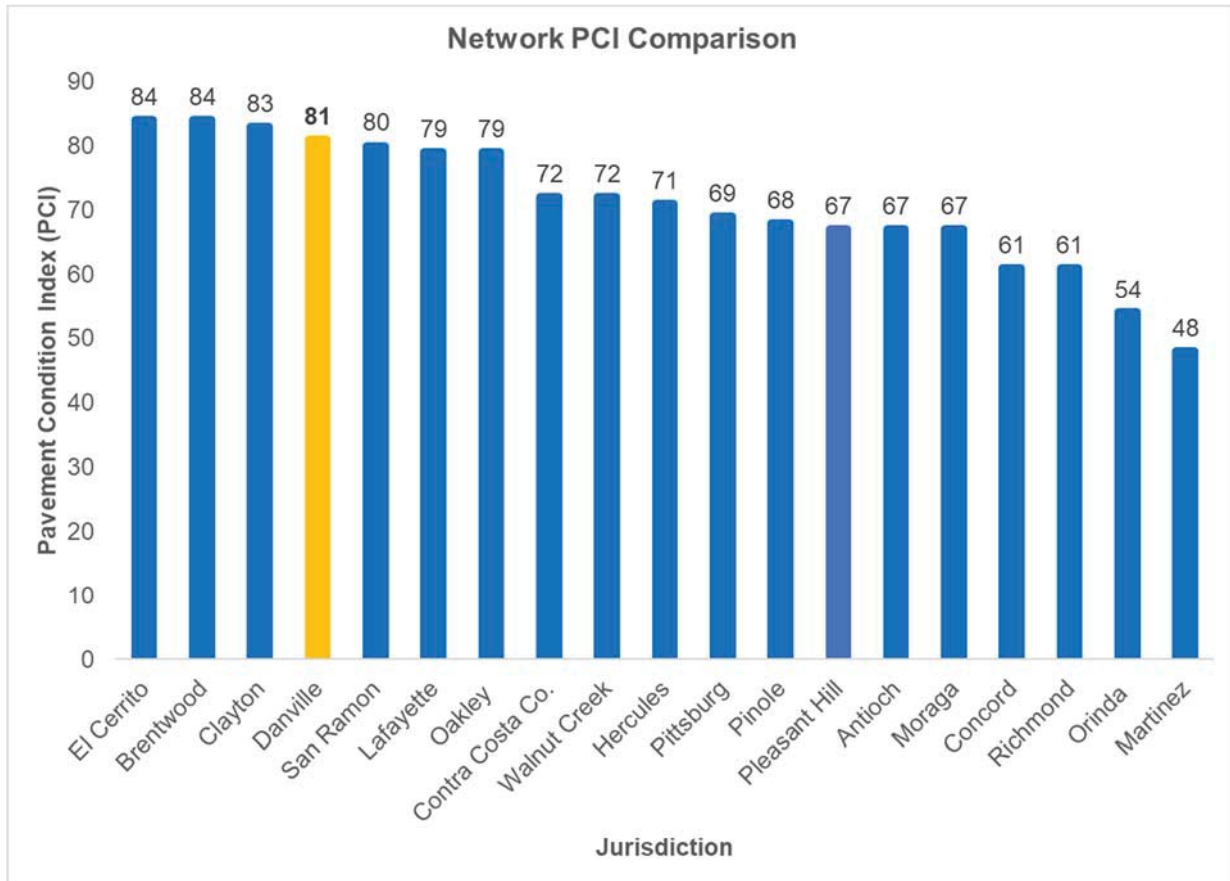

Figure 5 is a local agency network PCI comparison in Contra Costa County. Results were pulled from the Metropolitan Transportation Commission Vital Signs 2016² (Danville, Pleasant Hill, Oakley, and Antioch PCI was pulled in December 2017).
