Perceptions of Life

Textile (fabric & thread)

40" x 40"

\$5,500.00

My work is created with similar themes that have become a core part in expressing my life's message... people, places, perspective and photography. These elements help me describe the wonder of humans around the world and the life story each one represents. Perspective gives us the depth of place and time that came before us and continues beyond us, while photography records the unique moment of that story. Salvador Dali has been a consistent energy for me to use.
